

# Sample PDF Document

# Sample PDF Document

This is a comprehensive example of a PDF document generated using the Docen library. It demonstrates various document elements and formatting options.

## Document Structure

The document is structured using a tree-like AST (Abstract Syntax Tree) format, which makes it easy to manipulate and transform the content.

## Basic Elements

## Advanced Features

## Code Example

## Conclusion

This example demonstrates the power and flexibility of the Docen library for generating PDF documents. The AST-based approach makes it easy to create, manipulate, and transform document content programmatically.
